

Mitigation Strategy Objectives (ROD p. 34)

Include but not limited to:

- **Maintain functioning habitat to sustain fish and wildlife abundance and distribution**
- **Ensure access to subsistence use areas**
- **Contribute to the cleanup of previously disturbed sites**

Regional Mitigation Strategy Elements (ROD p. 40)

- Identify opportunities for avoidance or protection of special areas
- Identify resource values and functions that warrant mitigation
- Evaluate and prioritize mitigation actions
- Identify mitigation investment options (such as conservation easements, mitigation banks, in lieu fee funds, permittee-responsible actions)

Regional Mitigation Strategy Elements (ROD p. 40)

- Maximize effectiveness of actions, using various tools (durability, monitoring, adaptive management)
- Develop framework for future compensatory actions (such as developments that affect Best Management Practices or avoidance areas)
- Develop climate change resilience projects to support subsistence
